PERSONAL PROJECTS

AI-Based Attendance Management System (01/2024 - 02/2026)

- Developed an **AI-powered** attendance management system using Python and React.js that **automatically marks** student attendance from uploaded classroom images. The system utilizes image processing and **facial recognition techniques** to identify students from group photos and record attendance in real time.

WhatsApp Notification & Communication System (05/2026 - 06/2026)

- Built a **WhatsApp communication** platform with **QR code** authentication, enabling schools to connect WhatsApp accounts and automatically send attendance alerts, homework notifications, and notice board announcements. Developed **Node.js messaging services**, **React.js** management dashboard, REST APIs, and queue-based notification processing **supporting multi-school environments**.
