Summary

Full Stack Developer with **2.5+ years of experience** building scalable web applications using **React.js, Node.js, Laravel, PHP, MySQL, JavaScript, and REST APIs**. Experienced in developing enterprise-level platforms across **Mobility Management, Education ERP, and Business Operations** domains.

Technical Skills

- **Programming Languages:-** JavaScript, PHP, Python,
- **Frontend Technologies:-** ReactJS, CSS, Tailwind CSS , HTML
- **Backend Technologies:-** NodeJS, ExpressJS, RestAPI, MVC Architecture, Laravel
- **Databases:-** MongoDB, MYSQL
- **Tools/Platforms:-** Git, GitHub, VS Code, FramerMotion, Threejs

Professional Experience

Software Developer

Jan 2025 – Present

[Fi Ellements](#) | *ReactJS, NodeJS, , AWS, OpenAi, NestJS, TailwindCSS, Gitlab*

Remote, India

- **CRM Platform Architecture:** Leading frontend and full-stack feature development for **ZedFlow (zedflow.in)**, a high-throughput, service-based enterprise **CRM designed** to optimize customer data pipelines and sales automations.
- **Interactive Workflow Tools:** Building low-latency user interfaces and dynamic drag-and-drop dashboards using **React.js**, and **custom state management** configurations to manage real-time client activity feeds seamlessly.
- **State Preservation & Real-time Feeds:** Implemented clean, predictable data layers using **Redux Toolkit** to capture, buffer, and track complex user interactions and **asynchronous** data updates without drops in application fluidness.
- **API Feature Integration:** Designing and pairing modular backend services with reusable UI components, ensuring lightning-fast search capabilities and scalable customization options for corporate client environments.

Full-Stack Developer

Sep 2024 – Dec 2024

[Careernova technolog](#) | *React.js, Node.js, MongoDB, Express.js, GitLab, Tailwind CSS*

Remote, India

- **Phone Subscription Platform:** Developed key frontend and backend modules for **BytePe (bytepe.com)**, a subscription-based platform enabling users to lease premium smartphones and electronic devices through flexible monthly plans.
- **Performance & User Experience:** Improved application responsiveness through component optimization, efficient state management, reusable UI components, and optimized API interactions, resulting in a smooth user experience.

Backend Developer

Oct 2023 – May 2024

[Rdigi Work](#) | *PHP, Laravel, MySQL, Bootstrap, JavaScript, jQuery, REST APIs, GitHub*

Mumbai, India

- **School Management System Development:** Developed and maintained a comprehensive **School ERP** using **Laravel** and **MySQL**, supporting day-to-day academic and administrative operations for schools.
- **Role-Based Authentication & User Management:** Implemented secure authentication and authorization for **Admin, Teacher, Student, and Parent** portals with role-based access control and personalized dashboards.

Projects

AI-Based Attendance Management System | *Python, React.js, Face Recognition, MySQL, REST APIs, Git*

- **AI-Powered Attendance Automation:** Developed an intelligent attendance management system that automatically marks student attendance by recognizing faces from uploaded classroom images using computer vision and facial recognition algorithms.
- **Image Processing & Face Recognition:** Integrated **OpenCV** and Python-based face recognition models to detect, identify, and verify multiple students from group photographs with high accuracy.
- **Interactive Web Dashboard:** Built a responsive **React.js** dashboard enabling teachers to upload images, review attendance records, manage student profiles, and generate attendance reports.
- **Backend API Development:** Designed RESTful APIs using **Python** to process uploaded images, manage attendance records, and synchronize data with the database in real time.
- **Attendance Analytics:** Implemented attendance history, searchable records, and reporting features to simplify student attendance tracking for educational institutions.

WhatsApp Notification & Communication System | *Node.js, React.js, Express.js, Laravel, MySQL, Queue Jobs,*

- **WhatsApp Automation Platform:** Developed a multi-school WhatsApp communication system that securely connects school WhatsApp accounts using QR code authentication for automated messaging.
- **Automated Notification Engine:** Built backend services to send **Attendance Alerts**, **Homework Notifications**, **Notice Board Updates**, and **Fee Reminder** messages through WhatsApp with queue-based background processing.
- **Real-Time Session Management:** Implemented WhatsApp session lifecycle management, QR code generation, connection monitoring, reconnection handling, and multi-school authentication support.
- **Admin Management Dashboard:** Developed a React.js dashboard for administrators to manage WhatsApp sessions, monitor delivery status, and configure notification settings.

Educations

Bachelor of Engineering (Information Technology) | Theem College of Engineering
(Mumbai University)

CGPA - 8.5 | May-2023

Diploma of Engineering (Computer Science) | Viva College of Information Technology
(MSBTE)

80.91% | June-2020

Certifications

-
- Presented a paper on 'A Decentralized Crowdfunding Smart Contract Web Application using Blockchain' at **IEEE** [3rd International Conference on Smart Data and Intelligence]
 - Certificates of Course Completion (Coursera) - Python Programming.
